Width	800 mm
Depth	94 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Fine Motor Skills

Competitive Play

Inclusive Play

Auditory Stimulation

Games & Puzzles

Description

The PlayTronic Simon Says Play Panel is a fun activity panel which follows the same game play as the familiar "Simon Says" game with a random sequence of questions that it asks the children including... "Simon says touch your ear" "Simon says clap your hands" "Shake your head..." The addition of electronic sounds to panels adds another dimension and interaction between the user and the panel itself. Adding the extra complexity of electronics is nothing to worry about though because all the components used are commercial grade and have been designed specifically for this application. The whole system has been carefully designed and manufactured, and has now been out in the field for over 2 years with little or no reported problems apart from inevitable battery replacements, which have a life of up to a year depending on how popular the panel is. All PlayTronic panels include touch sensitive activation switches with no moving parts, water-proof speaker, sealed circuitry and battery compartment with easy to change long life batteries. All the electronic parts have been designed to fit in a durable steel, water resistant case with security screws to prevent unauthorised tampering. All the main components can be unplugged and swapped-out if there is ever a failure, making maintenance relatively cheap and easy to carry out. Constructed from hard-wearing HDPE it will not rot, crack or fade in UV. Perfect for the school playground or play space.
