Role Play

Description

The Underwater Scene Play Panel with Mirror Dome allows children to have fun and imagine they are in underwater. The domes are made from the best quality mirrored polycarbonate making them virtually unbreakable, and will not shatter and become unsafe in the playground environment. Secured to the main panel using an HDPE frame, which allows for different expansion rates and makes sure that the dome stays securely attached to the panel. Bespoke design options are also available. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can installed side by side or back to back. Please ask for further details of the options available.
