Fine Motor Skills

Tactile Stimulation

Inclusive Play

Understanding the World

Description

The Scientific Gears Play Panel features 3 sets of gears including high and low ratio gears and the addition of a small idler gear on the third set. The gears themselves have been reengineered to mesh more smoothly and they also run on stainless steel sealed bearings, so the action is very nice. There is an information panel which gives the children some experiments to think about and a Results and Observations dry wipe board insert to record the data. All the mechanics are safely located behind shatter-proof polycarbonate windows. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
